1935 GREETINGS

It gives me more pleasure to greet you, my friends and customers, with this, my 1935 folder price list, than it has on any catalogue since my first issue.

Realizing that my new original varieties of dahlias, especially the LITTLE DARLING MINIATURES and the new forms in modern single dahlias, have met so perfectly the wants of dahlia lovers for house decoration, I here want to thank you for your kind patronage. A welcome is extended to everyone to visit my dahlia field when in flower.

SPECIAL PREMIUM. Each order to the amount of \$5.00 received for any articles for sale in this folder after December 1st, 1934, and on or before February 15th, 1935, with cash in full, entitles you to select FREE for each \$5.00 any two bulbs listed and priced not over 50c each. Same to be sent with your order.

GUARANTEE

I guarantee all bulbs true to name. Should any bulb fail to sprout please return it to me immediately for replacement. Success in growing all plants depends largely on soil, care and fertilizer as well as the weather.

TERMS: Cash invariably in advance where persons are not known to me or C.O.D. if one-quarter of amount is sent with order. On all retail orders fully paid in advance, I will pre-pay carriage to any part of the United States.

Little Darling Miniatures

• They are real miniatures

See premium offer
on front cover page

The latest and most beautiful dahlias for dinner table decoration. Flowers two inches and under held erect on good stems for cutting. Singles and semi-singles in a large range of beautiful colors. Nothing else like them and visitors all say: "They are the most beautiful dahlias we ever saw." You can't realize their beauty until you see them.

They are just the right height to produce flowers with good stems and in great abundance; two to three feet and very branching and prolific. Prices for bulbs and seeds are within reach of all. Try some seeds as well as bulbs, then with your dinner, feast your eyes on these beauties of nature. Cheerfulness at meals helps to health and happiness. A bunch of LITTLE DARLING MINIATURES on the table will bring cheerfulness.

Prices: Guaranteed bulbs of named varieties, labeled, 50c each; 3 bulbs, \$1.00. Guaranteed bulbs unlabeled \$2.00 per doz.

Selected seeds: One package, 100 seeds 50c; 3 packages seeds to one address \$1.00.

Plants from seed bloom the first year and make good bulbs.

THE ORIGINAL LITTLE DARLING MINIATURE

This is a perfect single flower: Color light cream and nearly as small as a twenty-five cent piece.

The plants grow about 18 inches high and are very branching. That enables them to produce flowers abundantly. I have taken great pride in keeping this variety in perfect condition and identical with the original baby plant. Only a limited number of bulbs to spare this year at \$1.00 each.

Be sure your full name and address is written plainly on every letter and order.

KEEPING CUT FLOWERS. Flowers should be cut just before fully open and placed in water a few hours to harden before using. A cool cellar overnight is an ideal place.

The Newest in Single Dahlias

The Modern Type

The new Singles eclipse any single dahlias yet produced for beauty. They have fine stems for cutting which hold the flowers erect.

The new Singles are good keepers. (See keeping cut flowers, page three.) A little care in cutting them will also repay in their keeping.

Dahlias are adapted to most any soil except heavy wet ground. This can be lightened by a liberal application of sand or coal ashes.

My new prices will permit selecting colors best suited to taste without extra cost.

Each bulb (or division) is correctly labeled and guaranteed to sprout. Price: 50c each or 3 for \$1.00.

Guaranteed bulbs (or divisions) without labels \$2.00 per dozen.

Seeds from all colors mixed, \$1.00 per pkg., 3 pkgs. to one address \$2.00.

MISS AMBROSE. Butter yellow, shaded to gold. Very rich and attractive.

MISS ANNE. A beautiful shade of pink. Solid color. Very free bloomer.

MISS BEATRICE. Light canary yellow. A lovely flower. Fine form.

MISS BRADLEY. Rich old gold. A beautifully formed flower. Rich color.

MISS BULL. White, speckled and striped magenta. A most attractive flower.

Hardy Plants

- MIXED HARDY PHLOX.** Well established roots that will bloom this season. Mixed shades. Price, \$1.00 per dozen, postpaid.
- HARDY GERMAN IRIS.** Mixed colors. Roots \$1.00 per dozen, postpaid.
- HOLLYHOCK PLANTS.** Mixed colors. One-year-old plants, \$1.00 per dozen, postpaid in first three zones.

Pompon Dahlias

The tiny POMPONS are more popular each year as their adaptiveness is better appreciated. They bloom profusely throughout the season, making a mass of color above the low growing plants. Used alone in solid color, or alternated with Little Darling Miniatures, they make a most attractive border. They are long lasting as a cut flower and combine with a pleasing effect with Little Darling Miniatures or Singles.

Special price on quantities for extensive borders.

New Orchid Flowering Dahlias

The Orchid Flowering Dahlias are of foreign origin and a recent addition to the dahlia family of this country as a novelty. The petals are gracefully rolled and pointed. They are produced here in rather limited colors but make an exceedingly attractive group in the garden or home. The plants grow 2-3 feet high, producing flowers in abundance, held erect most gracefully. The cut flowers keep remarkably well.

Dwarf French Marigolds

Miniature dwarf French single marigolds surpass anything else in the whole marigold family for brilliant beauty.

They are yellow and red in many shades and thousands of different markings. Even the double dwarf miniature ones cannot equal them for garden display and house decoration. A very durable cut flower. Now please do not say you don't like marigolds and turn down this trial package of seeds for only 25c, for you will surely love them and thank me for advising their trial. The miniature brilliant flowers sell quickly at my roadside flower market. The plants continue blooming until the killing frosts. To show their exquisite beauty I am making this trial package only 25c, or 6 packages for \$1.00 in one order, postpaid.

A person with a little spare time can make good money selling these seeds to his friends.

Over 75 seeds in each package. One extra package free with every dozen sold.

Gladiolus

I am offering bulbs of a few varieties of gladiolus which I find sell readily as cut flowers, at my roadside market. Guaranteed blooming size bulbs.

ALBANIA. Pure white, with finely ruffled edges.

HALLEY. Salmon pink, with creamy blotch.

JOE COLEMAN. Very bright red, ruffled edges.

NORA. Light lavender.

WILBRINK. Flesh pink with creamy blotch on lower petals.

CARMEN SYLVIA.

ETHELYN. Orange yellow, most attractive shade.

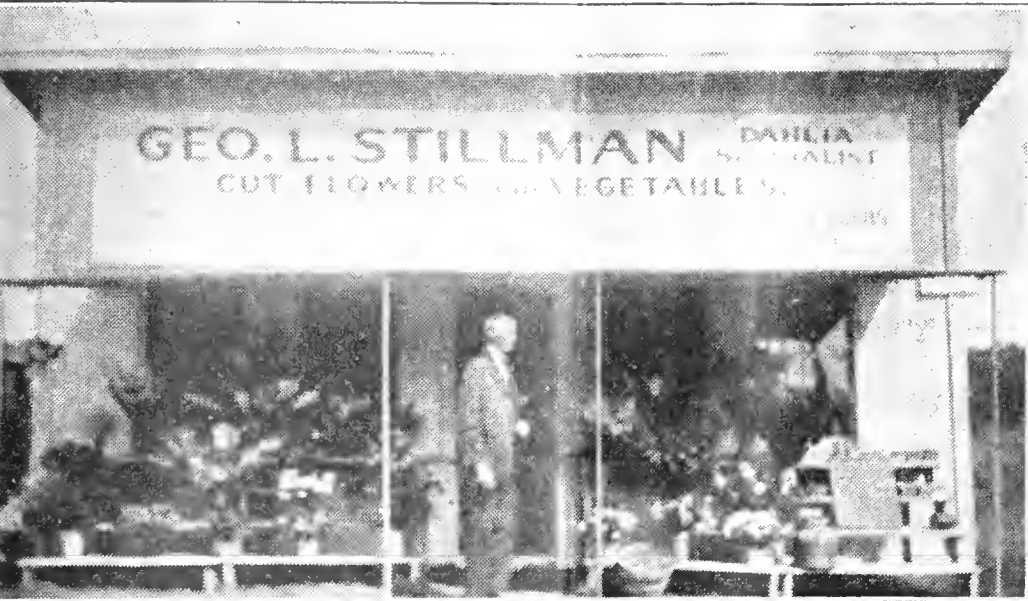

MYSTIC.

MRS. FRANK PENDLETON. Pink with carmine blotch on throat.

MRS. DR. NORTON. Light pink with pale yellow on lower petals.

Price of each kind, 50c doz., 3 doz. \$1.00.

**Be sure your full name and address is written plainly
on every letter and order.**

Everbearing Strawberries

RHODE ISLAND. This new original strawberry is yet to be surpassed. A large rich red with fine flavor and a beautifully shaped pointed berry borne profusely and on good stems. Plants set as early as the ground will permit will produce a good crop the same season. A good shipper and good keeper.

1 doz. plants, 50c; 50 plants, \$1.50, postpaid.

THE MASTODON. The Mastodon is called, by growers who have never grown the Rhode Island, the best everbearing berry. It is a very vigorous grower, sweet, nice flavor and has less acid than any everbearing berry. This season, 1933, I picked large ripe berries from the Mastodon, November 7. It will produce a crop in the summer and another in the fall if allowed to. If the buds are picked off in the spring the fall crop will be larger.

1 doz. plants 40c; 50 plants \$1.25, postpaid.

WORM KILLER. A tool to kill the dahlia borer (a big fat worm) inside the stalk without injuring the plant. This borer enters the stalk near the ground and feeds on the pulp until it reaches the top when the top breaks over. Its presence is determined by the hole in the stalk near the ground where sediment escapes. Directions for using with every tool, which can be carried in your pocket. Price 50c, postpaid.

Perfection in Sweet Corn

My ambition always was to produce a better sweet corn with larger ears and superior quality to the kinds in common use. This I succeeded in doing in the two following varieties:

SWEET ORANGE sweet corn (yellow) is nearly as early as the smaller yellow kinds. It has 12 and frequently 14 rows of kernels. Ears are much larger than the Bantam corn. It makes a profitable market corn and is a favorite table corn as well. Height about 4 feet.

Selected Seed \$1.00 per quart; 60c per pint; 35c per half-pint

MT. SHASTA SWEET CORN. This is the largest and best corn in existence. Although it is a very large corn it possesses an unusually pleasing, sweet and delicious flavor of its own, found in no other corn. The Mt. Shasta Corn sells itself.

It sold all through the past season in my field, where it grew, at my roadside stand, as fast as it matured, at 50 cents per dozen. I can safely state that no other sweet corn has in so short a time met with so great and popular demand as has the Mt. Shasta.

Selected Seed \$1.00 per quart; 60c per pint; 35c per half-pint

DIRECTIONS FOR PLANTING CORN

Make three plantings of SWEET ORANGE, and three of MT. SHASTA and you will have a continual supply of the finest green corn you ever ate.

Plant the SWEET ORANGE in rows three feet apart and hills three feet apart in the row. Three stalks to each hill. Fertilize liberally when planting according to the quality of the soil with poultry manure, but do not allow it to be placed less than five inches from the seed.

Plant the MT. SHASTA in rows $3\frac{1}{2}$ feet apart and hills $3\frac{1}{2}$ feet apart in the row. Allow only three stalks to a hill and if soil is weak only two stalks. Fertilize liberally when planting with poultry manure, placed not less than five inches from the seed.

Caution: Do not mix strong fertilizer with the soil when planting any kind of seed. It is liable to injure the seed. Allow the seed to sprout in the plain soil. It will find the fertilizer very soon four or five inches away.

I sell all my big field of Mt. Shasta corn at my roadside market on the Watch Hill Road (where it grows), as fast as it develops, at 50c per doz. Some of my customers drive more than 50 miles to get it.

Note: The first planting should be planted as early as the ground is suitable.
